LITERATURE SURVEY

YEAR	TECHNOLOGY	SOFTWARE	ADVANTAGE	DISADVANTAGE
2016	OCR, HCR	Machine Learning	The system not only produces a clasification of the digit but also a rich derciption of the Such as the writing style.	Digit string performance is medium.
2017	Artifical neural Network	Quantum Machine Learning.	Over handwritting the speed of data entry. this is because it is much is a to dictate the machine then to right.	Someone sitting next tours and talking to the machine Such as it is Noise to hear.
2018	Touch Screen.	PCA, LDA, CC	Reading postal amount, bank check amount.	Handwritten So diffcult to a AI
2019	Automatic digit deep Learning.	SVM, ANN, CNN	Performance of digit recognition is high	Limited number of machine Learning.
2020	Deep Learning.	CNN	The generative models can perform recognition driven Segmentation.	historical facts can be stored, reviewed and shared easily too many people.
